Project description

 **Playwright** for Python pypi package 1.56.0

conda | microsoft v1.56.0 join discord

Playwright is a Python library to automate [Chromium](#), [Firefox](#) and [WebKit](#) browsers with a single API. Playwright delivers automation that is **ever-green**, **capable**, **reliable** and **fast**. [See how Playwright is better.](#)

API Reference

<https://playwright.dev/python/docs/api/class-playwright>

Example

```
from playwright.sync_api import sync_playwright

with sync_playwright() as p:
    for browser_type in [p.chromium, p.firefox, p.webkit]:
        browser = browser_type.launch()
        page = browser.new_page()
        page.goto('http://playwright.dev')
        page.screenshot(path=f'example-{browser_type.name}.png')
        browser.close()
```

```
import asyncio
from playwright.async_api import async_playwright

async def main():
    async with async_playwright() as p:
        for browser_type in [p.chromium, p.firefox, p.webkit]:
            browser = await browser_type.launch()
            page = await browser.new_page()
            await page.goto('http://playwright.dev')
            await page.screenshot(path=f'example-{browser_type.name}.png')
            await browser.close()

asyncio.run(main())
```
